AARCOMM

100% INTERCHANGEABLE WIRELESS REMOTES

THE SMART SOLUTION FOR MANAGING A DIVERSE FLEET.

Aarcomm's wireless remote solutions deliver industry-leading performance and proven reliability, no matter what the conditions. With a wide range of custom machine types and configuration options offered through our customized firmware, our wireless remote will match your needs. One unit is all you need to back up or serve as a spare for your entire fleet.

Aarcomm's wireless remotes shine in even the toughest conditions and are backed by an unmatched 2 year guarantee.

'Transmitters and receivers that are waterproof (IP66 and/or IP67 rates'

Plug & Play compatibility with most Omnex T110/R160/R170 radio remote controls

2-Way Communication allows for sensor feedback on displays

High performance radio utilizing Frequency Hopping Spread Spectrum technology

Ruggedized to withstand the harshest environments

Digital function labels on a sunlight readable display that never fall off or wear out

Best-In-Class Performance

Narrow band frequency hopping spread spectrum and signal processing technologies mean outstanding range and reliable connectivity.

Simplify Your Operations

Compatible across all machine types, one unit can back up (or spare) for an entire fleet.

Unmatched Reliability

Industry-leading protection against ingress of dust and water.
