

BELLY PACK

EXCEPTIONAL PERFORMANCE, COMPLETE COMFORT

This belly pack is designed for environments that require high reliability and robustness. It provides miles of interference-free range for total and safe control of your boom pump - even from a distance.

Trusted to handle the toughest conditions, its large range of functionality delivers precision, performance and reliability.

Operators can access ten control buttons without having to remove their hands from the joystick operating position. All buttons are programmable, accommodating a wide variety of applications and user preferences. Two additional buttons can be placed on the joysticks as well.

PRODUCT FEATURES

Sunlight readable colour display for functions, diagnostics, and sensor feedback

Precision 3-axis joysticks for proportional control

Extended Range in Non-Line of Sight up to 3000 FT

IP66 & Ruggedized for Harsh Environments

**Backed by a
2-YEAR WARRANTY
& Great Service.**

EASILY UPGRADE YOUR CURRENT BELLY PACK REMOTE

It's a simple swap from your existing belly pack remote to the Aarcomm belly pack, the best-performing wireless belly pack remote on the market. With a quick plug-n-play swap-over that takes only a few minutes, you'll have a better remote in no time.

OUT WITH THE OLD, IN WITH THE NEW!

Step 1

Remove your existing receiver.

Step 2

Plug our receiver and potentially an adapter harness into the existing wiring.

Step 3

Power the Receiver, turn on the Belly Pack... Get back to work!
