- Can be cab-mounted on the doghouse or in a weather-proofed cabinet
- Optional integrated alarm buzzer & flashing light to signify remote missing while vehicle is in motion
- Uses Peltier technology to regulate the battery temperature during charging for optimal charging
- Never over charges batteries
- 15W charger rate, which minimizes charging time
- Can even charge your phone wirelessly

### PRODUCT FEATURES

Power can be supplied from USB-C to USB-C cable or powered via 12Vdc or 24Vdc vehicle battery power

Optional: CANbus communication & faceplate customizations

Optional: 900Mhz or 2.4Ghz Radio

# Enhanced Usability and Proven Reliability

The Universal Charging Cradle is powered by a USB-C to USB-C cable power supply (min. 40W) or with an internal power supply allowing it to be wired directly to the vehicle battery. Unique design features utilizing magnets have been incorporated to secure the unit while the vehicle is in motion.

## Never lose your remote again

The Universal Charging Cradle acts as a docking station complete with an audible alarm and flashing light to indicate a missing remote when the vehicle is in motion with no remote present.

## Compatible with all Aarcomm remotes

Compatible for with all Aarcomm remotes including our Belly Packs, Handhelds and Wireless Kill Switches. The Universal Charging Cradle can also wirelessly charge your cellular device.
