

WIRELESS HANDHELD

THE MOST RELIABLE & RUGGED INDUSTRIAL REMOTE CONTROL

The only remote you'll ever need.

The Aarcomm handheld delivers industry-leading performance and proven reliability, no matter what the conditions. With a wide range of custom machine types and configuration options offered through our customized firmware, our handheld remote will match your needs. One unit is all you need to back up or serve as a spare for your entire fleet.

Designed to thrive in situations where other remote controls fall short, the Aarcomm handheld empowers operators to effortlessly operate their machines, even in challenging non-line-of-sight conditions.

PRODUCT FEATURES

Both transmitter and receiver are waterproof (IP66 & IP67 rated)

Plug & Play compatibility with most Omnex T110/R160/R170 radio remote controls

2-Way Communication allows for sensor feedback on displays

Ruggedized to withstand the harshest environments

Digital function labels on a sunlight readable display that never fall off or wear out

High performance radio utilizing Frequency Hopping Spread Spectrum technology

No downtime. No nonsense.

The Aarcomm handheld lets you get the job done.

SUPERIOR PERFORMANCE	Advanced radio frequency engineering and signal processing technologies for better performance in range, response time and durability
COMPLETELY WATERPROOF	Guaranteed IP66 and IP67 waterproof rating for both transmitter and receiver
EASY SET UP	Plug-n-Play installation to get you up and running very quickly. Plug into the existing wiring of your previous remote control.
RUGGEDIZED TO SURVIVE HARSH ENVIRONMENTS	Performs to -40 degrees, survives toughest job sites
SAVE TIME, MONEY & BATTERIES	Wireless rechargeable permanent battery pack that lasts 10+ years

EASILY UPGRADE YOUR CURRENT HANDHELD REMOTE

It's a simple swap from your factory-installed handheld remote to the Aarcomm Handheld, the best-performing wireless remote on the market. With a quick plug-n-play swap-over that takes only a few minutes, you'll have a better remote in no time.

OUT WITH THE OLD, IN WITH THE NEW!

Step 1

Remove your existing receiver.

Step 2

Plug in our Receiver plus the Aarcomm Adapter Harness into the existing wiring.

Step 3

Power the Receiver, turn on the Aarcomm Handheld... Get back to work!
